

Data Science Program

Become Job-Ready with Data Science & Machine Learning ■

Course Overview

Master Data Science using Python, Machine Learning, and real-world datasets. This program focuses on hands-on learning with minimal theory to make you industry-ready.

Skills You Will Learn

- Python • Pandas • NumPy • Machine Learning
- Data Analysis • Visualization • Model Building

Hands-on Projects

- Customer Segmentation
- House Price Prediction
- Sales Forecasting
- End-to-End ML Project

Career Roadmap (Beginner → Job)

Stage	What You Learn
Beginner	Python + Data Basics
Intermediate	EDA + Visualization
Advanced	Machine Learning Models
Job Ready	Projects + Portfolio

Program Benefits

- 100% Practical Learning
- Certification Included
- Internship Opportunity
- Job-Ready Skills
