

Advanced Machine Learning Program

Master ML Models & Become Industry Ready ■

Course Overview

Learn advanced machine learning techniques including model optimization, ensemble learning, and deployment. This course focuses on real-world implementation with minimal theory.

Skills You Will Learn

- XGBoost • LightGBM • SVM • Random Forest
- Feature Engineering • Model Tuning • Deployment

Hands-on Projects

- Customer Churn Prediction
- Fraud Detection System
- Sales Forecasting
- End-to-End ML Pipeline

Career Roadmap (Beginner → Job)

Stage	What You Learn
Beginner	ML Basics + Python
Intermediate	Models + Evaluation
Advanced	Optimization + Ensembles
Job Ready	Projects + Deployment

Program Benefits

- 100% Practical Learning
- Certification Included
- Internship Opportunity
- Job-Ready Skills

Enroll Now – Limited Seats Available!
